EDUCATION

MIT World Peace University **2024 – 2026**
MCA Science - CGPA - 8.80 *Pune, India*

UKA Tarsadia University **2021 – 2024**
B.Sc (Information Technology) - CGPA - 8.19 *Bardoli, India*

EXPERIENCE

Siddesh Technologies Private Limited **Feb 2026 – June 2026**
Software Development Intern *Pune, India*

- Co-developing an AI-powered recruitment management platform, engineering reusable backend modules and data structures using the full MERN ecosystem (MongoDB, Express.js, React.js, Node.js).
- Designed and optimized 10+ secure REST APIs, system integration frameworks, and database routing layers to support multi-tenant query scaling.
- Worked with Git and GitHub for version control, participated in API testing and debugging, and contributed to improving application performance, maintainability, and overall development workflow.

PROJECTS

AI Chatbot using DeepSeek | *React, Azure, DeepSeek v3 API* **2025**

- Architected and deployed a highly scalable, GPT-like AI chatbot infrastructure on Microsoft Azure App Services using DeepSeek v3 API and a responsive React frontend.
- Achieved a seamless user interface response latency of under 800ms, facilitating reliable, real-time conversational pipelines.
- Engineered a resilient architecture optimized for consistent throughput during simulated traffic spikes and structured for modular feature expansions.

Online Movie Booking Platform | *Java Servlets, MySQL, HTML, CSS, JS, Bootstrap* **2024**

- Created a full-stack movie ticket distribution platform engineered via Java Servlets, successfully load-tested to handle over 500+ concurrent user sessions during peak hours.
- Designed and implemented an automated, live seat-locking mechanism that eliminated transaction race-conditions, securing a 99.9% booking accuracy rate.
- Programmed a dynamic administrative control panel for automated showtime allocation, providing instantaneous record propagation to schedules and seat manifests.

No Broker Management System | *PHP, MySQL, HTML, CSS, JS* **2023**

- Conceptualized and delivered a full-stack peer-to-peer real estate platform utilizing PHP and MySQL, dropping brokerage fee structures and lowering listing overhead for owners by 100%.
- Integrated an instantaneous chat and message-alert framework, slashing owner-tenant onboarding response times by 40% compared to legacy real estate systems.
- Developed isolated, role-based access modules (Owners, Tenants, Admins) prioritizing cryptographic session tokens, user privacy, and streamlined data separation.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, PHP

Frameworks / Technologies: Java servlets, React.js , Node.js, Express.js, Bootstrap

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Linux, Azure

Core Concepts: OOP, DBMS, DSA, Operating Systems, Networking, REST APIs

EXTRACURRICULAR

HACK MIT-WPU 2025 - Ideathon **March 2025**
Participant *Pune, India*

- Collaborated to design "AccessAbility," an adaptive AI assistant concept for accessibility.
- Contributed to the technical architecture proposal using assistive AI technologies.

CERTIFICATIONS

- SQL (Advanced) - HackerRank
- Python Fundamentals - Great Learning
- Java - HackerRank
- Full Stack Web Development - Coursera
